

Consulting technical question bank

FREE TEMPLATE

Study order: Case structure → Frameworks built from the question → Market sizing → Mental math → Charts and synthesis

Practice out loud with a partner, time yourself, and always finish with a clear recommendation.

Practice questions (say every answer out loud)

- ☐ A client's profits have fallen 20% over two years. How would you figure out why?
- ☐ Should a regional coffee chain expand into a new state?
- ☐ Estimate the number of electric scooters in a mid-size US city.
- ☐ Estimate the annual revenue of a campus bookstore.
- ☐ A hospital's wait times doubled this year. What would you look at first?
- ☐ Should a snack company launch a healthier product line?
- ☐ How would you price a new gym membership near a university?
- ☐ Profit = revenue – costs: break down each side for a food-delivery startup.
- ☐ What's 15% of 240? 7×68 ? $1,200 \div 16$? (Say it, don't write it.)
- ☐ Read this chart and tell me the one thing that matters.
- ☐ Summarize your recommendation in 30 seconds.
- ☐ Why consulting, and why our firm?
